Profile

Third-year Bachelor of Software Engineering undergraduate with a strong passion for software development and problem-solving. Strong teamwork, communication, and leadership skills, with the ability to adapt quickly to new challenges. Eager to apply and expand my technical knowledge through practical experience.

Professional Experience

Software Engineering Intern – SLT Telecom (6 Months)

Higher Education

Bachelor of Software Engineering – The Open University of Sri Lanka	(Reading – Third Year)
Higher National Diploma in Software Engineering – NIBM (GPA – 3.8)	(2024 – 2025)
Diploma in Software Engineering – NIBM (GPA - 3.95)	(2023 – 2024)
Certificate in Information Technology – ESOFIT	(2022 – 2023)
GCE A/Ls in Biology (Chemistry – C, Biology – S, Physics – S)	2021
GCE O/Ls in English Medium	2018

Tech Skills

Android Studio

Java

MySQL

GitHub

Spring Boot

Figma

Soft Skills

Communication

Teamwork

Time management

Problem-solving

Leadership

Task prioritization

Certifications

Postman API Fundamentals Student Expert

UOM Web Development

Kaggle Intro to Machine Learning

Sololearn Python Intermediate

Project Experience

1. Mobile Safety App – Individual Project

Developed an innovative women's safety mobile app using Java, SQLite, Firebase, Sensor Integration and Google Maps API in Android Studio

2. Tuition Management system – Group Project

Developed a mobile app using Java, SQLite, MPAndroidChart, Android FileProvider, Zxing QR code generator and Google Maps API in Android Studio

3. Car Rental System – Group Project

Developed backend services using Spring Boot and RESTful APIs. Integrated MySQL database and followed microservice architecture

4. Urban Food System – Group Project

Developed a full-stack web app using Java (Spring Boot), RESTful APIs, Oracle DB, and MongoDB. (Microservice Architecture)

5. Hostel Management System – Group Project

Developed a PHP & MySQL-based web application for hostel operations. Implemented CRUD functionality, user authentication, and form validation. Ensured data integrity and optimized SQL queries

6. Tourist Agent Management System – Group Project

Built a web application using HTML, CSS, JavaScript, Express.js, and MySQL. Implemented backend logic and database integration

7. Student Management system – Individual Project

Developed Java Swing desktop application using OOP principles and SQL

8. Smart Cart Robot Project – Group Project

Built using C++ and Arduino, integrating IR/Rfid, Ultrasonic, Load Cell, Bluetooth, and power modules for smart product detection, weighing, and billing in retail automation.

9. Fetal Health Monitoring ML Model – Individual Project

Built a Random Forest Classification model using Python.
